

Environmental Policy

A Jifmar Group policy

DIR-POL-003-04

Updated July 2024

The seas, oceans and inland waters on which our vessels operate daily are precious working tools for our company. Therefore, protecting the environment by limiting our environmental impact is one of our core values. Thus, Jifmar Group is strongly committed to minimising its environmental footprint by implementing an effective environmental management system for all its operational, land and maritime activities across all its subsidiaries. Keeping in mind the ability to decarbonise our operations. The long-term goal of Jifmar is to achieve zero spills or other sources of pollution that harm the environment.

OUR COMMITMENTS:

01. Slow steaming & environmental impact

We are constantly seeking to reduce our environmental impact by reducing our gas and energy consumption and limiting our use of exhaustible resources as much as possible. Jifmar highly promotes slow steaming onboard its vessels.

02. Prevention and risks management

We prevent pollution risks by training our employees on proper methods of operation on board and teaching them to react effectively in the event of incidents.

03. Partnerships

Protecting the environment is a priority in top management business decisions. Jifmar enhances contractual relationships with environmentally friendly partners.

04. Innovation

Extending our activities to new environmental markets and promoting marine renewable energies.

05. Environmental watch

Guaranteeing the continuous improvement of our environmental management system and ensuring conformity with all relevant updates environmental regulations and codes such as MARPOL.

06. Sustainability

Beyond the only aim of minimising our impact on the environment, Jifmar Group's top management constantly seeks to consider the social and economic dimensions as part of strategic decisions.

0 PLASTIC & 0 PAPER

The zero plastic & zero paper policies aim to eliminate single-use plastics and reduce paper use in the company's business.

Our SMS forms were digitised to reduce paper recording on board our fleet. A contractual requirement has been introduced with our main suppliers to eliminate the use of plastic packaging for products ordered.

Jifmar Group is committed to innovating projects to reach zero plastic and zero paper goals.

SLOW STEAMING

Jifmar Group is highly committed to reducing its carbon emissions. Jifmar enhances slow steaming culture within its organisation through an innovation development process and proactive actions launched by QHSE that onboard the entire Jifmar fleet.

WASTE MANAGEMENT

Ensuring the recording and monitoring of all our waste, both hazardous and non-hazardous, until disposal and enforcing onshore waste segregation in accordance with the 5-flow approach. Jifmar Group highly promotes reuse whenever possible at all levels, whether on-site or at headquarters.

Jean-Michel BERUD, Jifmar Group CEO
